Closer presentation of companies of the export area

IRAN

Company:

National Water and Wastewater Engineering Company (NWWEC)

State-owned enterprise National Water and Wastewater Engineering Company (NWWEC) was founded in 2002 and it organizes all projects related to water and waste water for the Iranian Ministry of Energy.

This company is also active in projects of seaside desalination plants that should be saturated by drinking water from the desalinated salt water. Since there is insufficient infrastructure in these areas, a source of energy, ensuring energy for the plant operation, will be built close to each such desalinating plant. These energy devices will be operated by natural gas.

NWWEC has a large amount of projects within the scope of 20 - 30 mil. dollars and is active in the Middle East and North Africa.

EGYPT

Company:

PETROJET

State-owned enterprise PETROJET was founded in 1975 and it employs approximately 26,000 people.

It is equipped by modern technologies and construction devices. In the area of the Middle East and North Africa, it belongs among the largest full-service construction groups that provide integrated services for the oil, gas and petrochemical industries.

It realizes complex projects in Egypt, Libya, Jordan, Saudi Arabia, Sudan, Yemen, Algeria, Lebanon, the UAE, Qatar, Oman and Iraq.

PETROJET also aims to build a roof for the construction of the first nuclear power plant in Egypt and it is highly interested in the cooperation with experienced Czech suppliers of the nuclear industry who would like to participate in this project.
